PROFILE

Full-Stack Developer with 2.5 years of experience building user-friendly and scalable web applications using React, Next.js, and Node.js. Skilled in both front-end and back-end development.

WORK EXPERIENCE

Freelance Engineer
May 2023 -

- Develop user-friendly front-end interfaces using HTML, CSS, and JavaScript (including frameworks like React or Next.js).
- Build secure and scalable back-end functionalities using Node.js or other server-side technologies
- Integrate with third-party APIs and databases as needed.

Full Stack Engineer
The Javascript shop   Sep 2022 - May 2023

- Developed ecommerce web application using Redwood.js and intergrated chat bot for chat functionality.
- Developed and deployed Selenium crawlers as AWS Lambda functions for court case data API.
- Developed a POC for embedding office documents using the WOPI protocol.

Freelance Engineer
Kalyana Mandali   Jan 2022 - Aug 2023

- Developed a WhatsApp bot to automate personalized messaging.
- Successfully transitioned the entire codebase from JQuery to React.
- Collaborated in UI and back-end integration, optimizing user experience

----

PROJECTS

Finance Manager

- Developed a web application that streamlines bank statement management.
- It utilizes data conversion algorithms to process uploads, stores them in a relational database for efficient retrieval, and renders them in an interactive table.
- Users can leverage filtering and tagging functionalities for in-depth transaction analysis.

Pinnacles Infotech

- Built a captivating marketing website using React, a popular JavaScript library for building dynamic user interfaces. The website leverages animation techniques to create a visually engaging and interactive user experience.
